

Help... I need a website!

Please fill out this form where appropriate and email to: info@globalcreative.co.uk

We are passionate about the web, and we're ready to build you a gorgeous, effective and user friendly website. To help us understand your needs please fill in our Website Questionnaire. This is the starting point for any of our projects and will help us understand you and your requirements. The more detail you give us, the better we'll be able to help you.

Please see our top 10 considerations to help you plan your project [here](#).

Who are you?	<input type="text"/>
Name & job title	<input type="text"/>
Email address	<input type="text"/>
Phone number (include area codes)	<input type="text"/>
Project Manager (project contact)	<input type="text"/>

Time & Money

We have to ask (and it's okay if you can only give us your best guess), but do you have a budget in mind for this project? Knowing a rough budget will help us respond to you needs in a way that's realistic and achievable. The use of technology in your website is important and we will need a rough budget plan so we know what technology to include.

Do you need the site to go live by or on a certain date? If you do, why? (A press campaign, a specific event etc.)

Your Organisation

Tell us about your organization. Where are you based, what do you do, who are your customers? What makes you special?

- Would you describe your organization as being...
- Small but perfectly formed?
 - Medium?
 - Large?
 - Huge?

Your Existing Website

Your existing web address?

Do you want to replace an existing website?

How does your current website make you feel?

- Very, Very Sad?
- Sad?
- Somewhat Sad?
- Indifferent?
- It's not too bad?
- I like it?
- It's great?

Why do you feel this way?

Down To Business

What is the site's purpose and what will it do? What business problems do you need your site to solve?

Who are your competitors? Do they have websites, if they do what are their web addresses?

What emotions should the site convey? What perception of your organization/brand should users get from using the site?

Do you need to write new content for your website?

Your Site's Audience

Who are your primary users going to be? (These are the most important people – if they like it, use it, then it'll be mission accomplished. There can be multiple groups of these primary users, so give us as much detail as possible)

Who else do you think will use the site?

Have your current users reported any problems or issues that they'd like addressed?

Functionality & Nerdy Details

How big do you think your site will be? How many pages of content?

Do you want to use a content management system?

Yes?

No?

Does the site need to have any specific functions (E-commerce, forums, chat applications, social networking features, members area...etc.)

Would you like to present Flash content, video content, audio content or any other media types?

Thank you - email this form back to us here:
